Project Governance

David Runge

2019-08-10
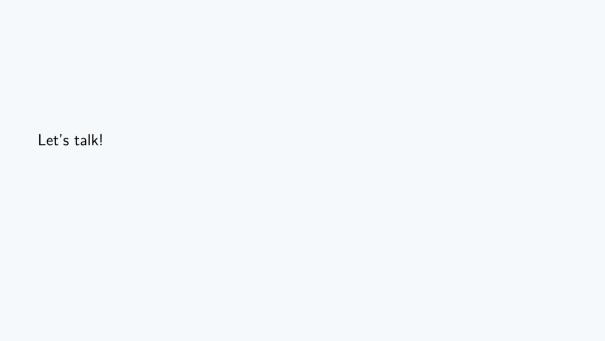

Doctor: What seems to be the problem?

- Overview is missing on an inter-team level (silos)
- Decision making process often intransparant (e.g. become a developer)
- Workflows are often undocumented
- Growing beyond a certain amount of volunteers requires direction (leadership)

Apply medicine?

- ▶ Assign project management role(s)
- ▶ Think of standardized processes to describe what Arch is and how it works (e.g. Request For Change (RFC) - change management)
- ▶ Give teams more power to decide upon their area of expertise

Let's talk!
